OUR COMPANY

As a technology service provider, TECECORP develops cutting-edge software technologies for top operators in Cameroon and through-

out the world, including numerous industry pioneers and entrepreneurs. We devise solutions for tomorrow`s world

INNOVATION

The globalized economy is changing the way in which products and services are developed. Decentralized structures and ever shorter development cycles are integral to the challenges that globally operating companies must confront. This requires know-how and above all mobility on an entirely new scale. We have recognized this development and are creating a flexible resource that is freely available to companies. Our high-tech solutions guide products through critical milestones to their successful introduction and an optimized life cycle.

SERVICE SCALABILITY

With TECECORP as a technology partner, gaps in know-how are no longer a factor in development. We bring specific expertise to bear on the process and create solutions that are not just perfectly integrated into the end product but into the customer`s processes as well. Just what role TECECORP plays in this is defined by the client: Whether providing support, independently developing sub-sectors or assemblies, or taking the lead role, TECECORP offers solutions capable of being designed so flexibly that even the ongoing project can be adjusted at any time.

The smooth running of the project is ensured by our process know-how, combining agile methods and tools.
